Introduction

In 1941, we introduced our first edition of *Facts & Figures*. “There is need for concise and accurate data,” we wrote. “Facts give a broader perspective, facts dissipate predilections and prejudices...[and] this collection of data is an important step to meet the challenge presented by the broad problems of public finance.”

This edition of *Facts & Figures: How Does Your State Compare?* builds on those seventy years of tradition. Mailed to every state legislator and governor, this handbook is designed to be a pocket- and purse-sized guide to how states rank on tax rates, collections, burdens, and more.

The tables were compiled by Tax Foundation staff and edited by staff economist Mark Robyn. We hope these facts contribute to a healthy public debate.

Table 9 (continued)

Note: Brackets are for single taxpayers. Some states double bracket widths for joint filers (AL, AZ, CT, HI, ID, KS, LA, ME, NE, OR). NY doubles all except the top two brackets. CA doubles all but the top bracket. Some states increase but do not double brackets for joint filers (GA, MN, NM, NC, ND, OK, RI, VT, WI). MD decreases some and increases others. NJ adds a 2.45% rate and doubles some bracket widths. Consult Tax Foundation website for tables for joint filers and married filing separately.

(a) 2011 rates but 2010 brackets. 2011 brackets were not available as of press time.

(b) Tax applies to interest and dividend income only.

(c) On January 12, 2011, Illinois increased its rate from 3% to 5%, retroactive to January 1, 2011.

(d) Rates apply to regular tax table. A special tax table is available for low-income taxpayers which reduces their tax payments.

(e) Bracket levels adjusted for inflation each year.

(f) These states allow some or all of federal income tax paid to be deducted from state taxable income.

(g) Local income taxes are excluded. 14 states have county- or city-level income taxes; the average rate, weighted by total personal income within each jurisdiction, is: 0.19% in Ala.; 0.6% in Ark.; 0.16% in Del.; 1.16% in Ind.; 0.3% in Iowa.; 0.76% in Ky.; 2.98% in Md.; 0.44% in Mich.; 0.12% in Mo.; 0.09% in N.J.; 1.7% in N.Y.; 1.82% in Ohio; 0.36% in Ore.; and 1.25% in Pa (weighted local rates are from *Tax Foundation Background Paper*, No. 60, "2011 State Business Tax Climate Index").

Note: In addition to regular income taxes, many states impose other taxes on corporations such as gross receipts taxes and franchise taxes. Some states also impose an alternative minimum tax.

(a) Michigan, Ohio, Texas, and Washington do not have a corporate income tax but do have a gross receipts tax with rates not strictly comparable to corporate income tax rates. See Table 18 for more information. Delaware, New Hampshire, and Virginia have a gross receipts tax in addition to the corporate income tax.

(b) Businesses with entire net income greater than \$100K pay 9% on all taxable income, companies with entire net income greater than \$50K and less than or equal to \$100K pay 7.5% on all taxable income, and companies with entire net income less than or equal to \$50K pay 6.5% on all taxable income.

(c) On January 12, 2011, Illinois increased its corporate income tax from 7.3% to 9.5%, retroactive to January 1, 2011. Illinois's rate includes two separate corporate income taxes, one at a 7% rate and one at a 2.5% rate.

Note: Some states levy gross receipts taxes in addition to sales taxes. See Table 18 for information on gross receipts taxes.

(a) City, county and municipal rates vary. These rates are weighted by population to compute an average local tax rate.

(b) Three states levy mandatory, statewide, local add-on sales taxes at the state level: California (1%), Utah (1.25%), and Virginia (1%). We include these in their state sales tax.

(c) Hawaii's and New Mexico's sales taxes have broad bases that include many services.

(d) California's state sales tax is scheduled to drop 1 percentage point on July 1, 2011.

(e) Due to data limitations, table does not include sales taxes in local resort areas in Montana.

Source: Tax Foundation; state revenue departments.

DC	23.5	0.0	23.5	–

Note: The American Petroleum Institute (API) has developed a methodology for determining the average tax rate on a gallon of fuel. Other Taxes and Fees may include any of the following: environmental fees, storage tank taxes, other fees or taxes, and general sales tax. In states where gasoline is subject to the general sales tax, or where the fuel tax is based on the average sale price, the average rate determined by API is sensitive to changes in the price of gasoline. States that fully or partially apply general sales taxes to gasoline: CA, CO, GA, IL, IN, MI, NY.

Note: See Table 32 for average people per household by state. The income measure used adds the following to Bureau of Economic Analysis's personal income measure: capital gains realizations, pension and life insurance distributions, corporate income taxes paid, and taxes on production and imports less subsidies. It subtracts from personal income the fungible portion of Medicare and Medicaid, estimated Medicare benefits that are provided via supplementary contributions, initial contributions to pension income and life insurance from employers, and the annual investment income of life insurance carriers and pensions that is included in personal income.

As a nonpartisan educational organization, the Tax Foundation has earned a reputation for independence and credibility. However, it is not devoid of perspective. All Tax Foundation research is guided by the following principles of sound tax policy, which should serve as touchstones for good tax policy everywhere:

Simplicity: Administrative costs are a loss to society, and complicated taxation undermines voluntary compliance by creating incentives to shelter and disguise income.

Transparency: Tax legislation should be based on sound legislative procedures and careful analysis. A good tax system requires informed taxpayers who understand how tax assessment, collection, and compliance works. There should be open hearings and revenue estimates should be fully explained and replicable.

Neutrality: The fewer economic decisions that are made for tax reasons, the better. The primary purpose of taxes is to raise needed revenue, not to micromanage the economy. The tax system should not favor certain industries, activities, or products.

Stability: When tax laws are in constant flux, long-range financial planning is difficult. Lawmakers should avoid enacting temporary tax laws, including tax holidays and amnesties.

No Retroactivity: As a corollary to the principle of stability, taxpayers should rely with confidence on the law as it exists when contracts are signed and transactions made.

Broad Bases and Low Rates: As a corollary to the principle of neutrality, lawmakers should avoid enacting targeted deductions, credits and exclusions. If such tax preferences are few, substantial revenue can be raised with low tax rates. Broad-based taxes can also produce relatively stable tax revenues from year to year.
